

Quality Control Process
Independent Product Studio
Madison Lam - Little Ellie Crochet
2022 - 2026

Checkpoint 1: Material Inspection

- ☐ Yarn - size 4, 100% acrylic, Joann Big Twist Value, 170g (347 m / 380 yd) / skein, variety of colors, same dye lot number
 - ☐ Machine washable, low iron, do not bleach or tumble dry, dry flat
 - ☐ Fail: inconsistent dye lot, inaccurate color, insufficient supply
- ☐ Hook - 3.25 mm (adjust as needed per tension), ergonomic grip
- ☐ Sewing Needles - metal large and small needles
- ☐ Safety Eyes - 12 mm with safety back
- ☐ Other materials - sufficient polyfil fiberfil stuffing and fabric glue

Checkpoint 2: Drafting Check

- ☐ Initial sketch - character design, accurate colors
- ☐ Base pattern - basic doll pattern, finish of 22 cm tall, minimal sewing
- ☐ Details - layered and removable clothing, sew on scars/beauty marks/accessories

Checkpoint 3: Mid-Construction Check

- ☐ Stitch count - per row / round, number of increases / decreases
 - ☐ Check stitch count at end of every changing round
- ☐ Tension consistency - even stitches, no wide holes, circular as expected
- ☐ Accuracy - matching original draft, symmetry, intended shape / function

Checkpoint 4: Finishing and Final Inspection

- ☐ Character Satisfaction - matching original character design
- ☐ Seams - color changes within 0.25 cm margins
- ☐ Loose Ends - all secured and tucked away
- ☐ Extensions - all sewn on components secured, glued components and safety eyes fixed

Checkpoint 5: Defect Tracking

- ☐ Pattern Testers - preliminary feedback from pattern testers documented and taken in to adjust product before sales
- ☐ Failed Piece - rework if possible, scrap as needed until meets requirements
- ☐ Revisions - return to drafting phase as needed, reconstruct piece, run through testers and pattern iteration until meets satisfactory
